

ID Solutions

IT'S ONLY TECHNOLOGY UNTIL IT BECOMES A **SOLUTION**.

IDVideoPhone: Cloud Based Telepresence

Connect with Anyone from Anywhere

You truly have to see it to believe it; let us show you

Interact with your associates, customers or patients like never before. A breakthrough in technology provides a high definition video conferencing experience where interactive visits are just a mouse click away. Use your own virtual meeting room to collaborate and discuss topics as if you were both physically present.

Personal Telepresence for any user with a PC or MAC and a standard broadband connection

A virtual meeting room is just like having your own personal meeting space, complete with a lock, privacy shade and access code. You can open up your room to the general public for an informal drop-in to discuss a new business idea, product rollout or preparing for the project due on Monday. Or, you can set up a pre-defined time for a formal meeting and invite on-line guests from anywhere in the world via a standard broadband connection. A username and password is all you need for access and subscribers enjoy unlimited room time. Just think of how much more productive you can be.

An Ideal Way to Meet for:

- **Medical organizations**
- **Businesses of any size**
- **Educational institutions**
- **Government and Law Enforcement Agencies**
- **Users within your organizations' network**
- **Users outside of your organizations' network**

Natural Workflow Features Include:

- **Access to your own lockable personal meeting room**
- **Rooms that can hold up to 50 participants**
- **Works with H.323 video systems and phones**
- **Guest links to easily invite a guest to your room**
- **Security and encryption**
- **Ability to share PC and MAC applications**

ID Solutions - Leaders in Personal Telepresence

When it comes to providing visual communications, few companies can compete with our video offerings and customer support for the business, medical, government and educational community. ID Solution's award winning integration capabilities combine exceptional quality, user simplicity and manageability to make video communications a productive, true-to-life experience. IDVideoPhone delivers SVC based high definition video communications services that are unsurpassed in the industry and fully interoperable with existing H.323 based systems from Lifesize, Polycom and Tandberg.

ID Solutions - improving the way in which we all communicate.

IDVideoPhone Operation

Basic Requirements - A Computer, Webcam and Headset

Unlike other personal telepresence solutions, no special hardware is required. You can host your own virtual office with a basic PC or laptop, a web camera and headset. Once you have an account you simply call into your meeting room and invite others to join you. You can establish a guest access code to enter before joining your room, pull down a privacy shade and even post your office hours. Both Windows and Mac OS are supported. Getting started is as easy as:

1: Login to the system

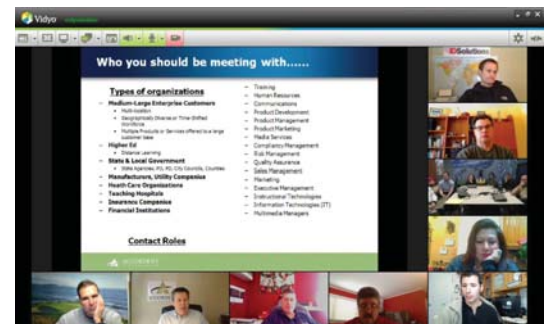

2: Open up your room for business

3: Meet with guests

IDVideoPhone Flexibility and Performance

IDVideoPhone is sold as a hosted (managed) service or as an on-site installed solution. Users are provided their own meeting room and can meet with other IDVideoPhone users as well as out of network guests.
